

Tools to Improve Diabetes Care in the Hospital

Evidence is growing that good glucose control and carefully managed inpatient care for people with diabetes has tremendous benefits for both patients and hospitals.

This unique DVD set can aid your diabetes care improvement efforts.

The set contains:

- Presentations summarizing new national developments
- Tips for developing your own improvement strategies by experts in the field
- Over 70 sample forms from hospitals across the country of policies, protocols, procedures and training guidelines - use these to design your own

The DVD set is the product of the 3rd Annual *Quality Diabetes Care in the Hospital* Forum held November 2006 in Minneapolis, Minnesota. This exciting event was hosted by Diabetes CareWorks, the Minnesota Department of Health and the Minneapolis St. Paul Diabetes Educators.
